

**I have two Aussie Shepherds with totally different issues.**

**My male is a worrier, if I was around he had to be with me. If I went through a gate he had to come too. He was okay left in his Kennel run when I went to work.**

**My bitch was a butterfly with very little concentration levels, a little anxiety.**

**I contacted Helen at Animal Equilibrium and through the application of her therapies she has certainly helped my special companions. The behavioural issues with both dogs have certainly improved.**
